

Pathways HealthConnect

Your Local Connection to Good Health

What's Pathways HealthConnect?

Pathways HealthConnect is a free program that helps community members connect to the services and support they need to be healthy.

Who Can Participate*?

- ✓ People with Medicaid (Apple Health) in Clark, Klickitat and Skamania counties
- ✓ People who need help connecting to services and support
- ✓ People with complex healthcare needs

What Can Pathways HealthConnect Help With?

- Medical, dental or mental health care
- Housing, transportation, food, clothing
- Transportation
- Substance abuse treatment
- Childcare and parenting education
- Utility help
- Financial help
- Education and employment
- Domestic violence
- And more!

How Does it Work?

Participants are connected with a Community Health Worker (CHW)/Peer.

The CHW meets with them in their home or in the community.

They'll receive help connecting to services and support along the path to better health.

What's a CHW/Peer?

CHWs/Peers are community members who know their way around healthcare, social services and other programs, and may have shared experience managing health conditions. CHWs help their neighbors and community members get the support they need.
